

ONE103OIL

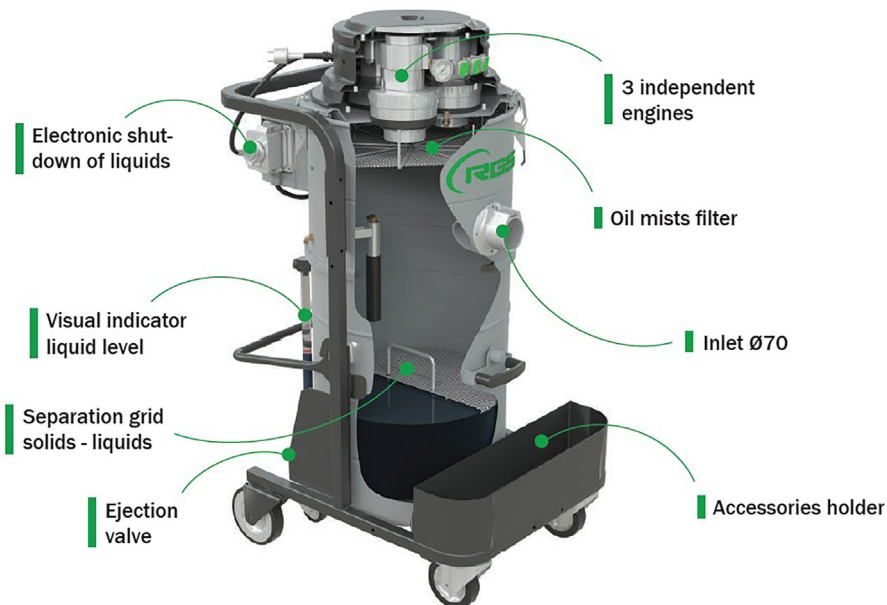

Compact and handy single-phase industrial vacuum cleaner, suitable to be placed alongside even the smallest machining centers, equipped with 3 powerful single-phase motors with independent starting thanks to which it is possible to always obtain the right suction power. The automatic liquid stop system allows you to always suck the right amount of liquid ensuring the safety of the workers and simplifying operations, while the discharge of the sucked fluid is simply made by acting on the tap valve on the bottom of the barrel.

Legend	Unit	ONE103OIL
Tension	V	1~ 230-400V/50Hz
Power	Hp	5
Depression Max	mbar	210
Air Flow Max	cfm	300
Standard liquid discharge system	-	Ball /valve
Liquid capacity *	gal	26
Solid capacity *	gal	11
Liquid shutdown	-	Electric
Inlet suction	in	3
Filter	-	Oil Mists
Noise level	dB(A)	75
Size	cm	78x64x120h
Weight	lbs	137
Protection	IP	44

ONE103OIL

The OIL103 is equipped with a durable perforated bag filter capable of capturing particles as small as 100 microns, ensuring effective separation and cleaner operation.

Advantages

- > **Compact and versatile** single-phase vacuum cleaner
- > **Practical handle** for easy transport
- > Suitable for **the suction of liquids and solids**
- > **Detachable tank** for easy emptying
- > **Accessories holder** to always have them at hand
- > **Reduction of machine downtime up to 80%**
